Skills Set, Tools & Technologies

HTML CSS SCSS

JavaScript TypeScript

Vue 3 VueX Vue-Router

React Redux React-Router

NodeJS Express Firebase

MongoDB | MySQL (basics)

Git Github VS Code

Babel Webpack Vite

Heroku npm | yarn | pnpm

Areas of Interest

- Web Development
- Open Source Development
- Learning New Technologies

Projects: [\[links\]](#)

- **only-package-manager:**  
A NodeJS based CLI app made using TypeScript that runs the correct package manager command (npm / yarn / pnpm) the project is using.
- **login-module:**   (react)  (express)
A login & signup module with an editable profile. Created two versions of it for practice, first using React, Redux & firebase as the backend & the other using Node, Express, and MongoDB.
- **quick-repository:**  
A single command to quickly create a repository locally & also host it on Github. Made using Node, TypeScript & Github's Octokit package.
- **git-alias:**  
Created declarative & human-friendly aliases for commonly used git commands & documented it on a static SPA site built using Vue 3.

Open Source Contributions:

- **blazepack:** 
Contributed to Blazepack (a super-fast dev server powered by sandpack) by fixing bugs, and implemented its help command.
- **types-sync:** 
Contributed to types-sync (Keep your types in sync with DefinitelyTyped) by adding a feature to autodetect project's package manager.

Other Fun Projects:

- **vue-calculator:**  
A calculator made using Vue 3 with some customizable themes & designs.
- **theme-darklight:**  
An elegantly pleasant dark theme for vscode.
